Assess. Build. Enhance
Design The Best **Governance Framework** on **OCI**

60%

Enterprises reduced security lapses by 33% with streamlined **cloud governance**

Source: Datadiversity.net

Enterprises are moving to cloud for the well established benefits of cloud migration. But, your cloud environment, on a single or hybrid platform, may carry the **risk** of **security, non-compliance, cost overrun** and **performance inconsistency.** Failing to deliver desired SLA and other outcomes will delay your aspirations to scale up the landscape.

So, how do you deliver on the promises?

1. Consistent monitoring, audit readiness and governance assessment
2. Right policies and framework for the governance system

CLOUD4C
A CtrlS Company

How do you ensure a **compliant, cost-effective** and **secure infrastructure** on the cloud?

Derisk your cloud environment by establishing a robust **Cloud Governance Framework.** Strong governance will enforce rules and policies on all business processes in the Cloud, for **easier monitoring** and **regular audit.**

This will ensure that the security compliances are met and the overall cost, control and efficiency are optimized, to deliver the outcomes aligned to business objectives of the organization.

Governance Assessment for Oracle Workloads with Cloud4C Advantage

Cloud4C developed the best industry cloud adoption framework based on **OCI governance assessment,** helping organizations evaluate their governance strategy. The team of experienced and certified experts deliver specific solutions to align your workloads on OCI to industry specific **compliance standards** as per regions. Your IT landscape is **audit ready** at all times. We map your system, networks and applications on OCI to required **regulatory standards,** deploying OCI native and third party tools for **peak performance.** Cloud4C understands the need and importance for assessment of cloud governance protocols. Our experts evaluate existing governance compliance and corporate policies against OCI best practices to design the policy frameworks that meet your **security, scalability** and **cost optimization** goals.

Our Governance Framework Ensures

- **Alerts** on processes that do not comply with established policies
- **Optimized costs** and **advanced security** with defined **access control**
- Well-designed policies for keeping track of **cloud performance progress** during migration

Interactive OCI Governance Assessment Workshop

Cloud4C brings you up to speed on the required governance standards to sustain a **high performing cloud infrastructure.** We work with you to understand your business needs and align your cloud strategy accordingly. Our experts engage your teams in an intensive workshop to explain the global best practices in **OCI governance** standards inline with the **Cloud Adoption Framework (CAF).**
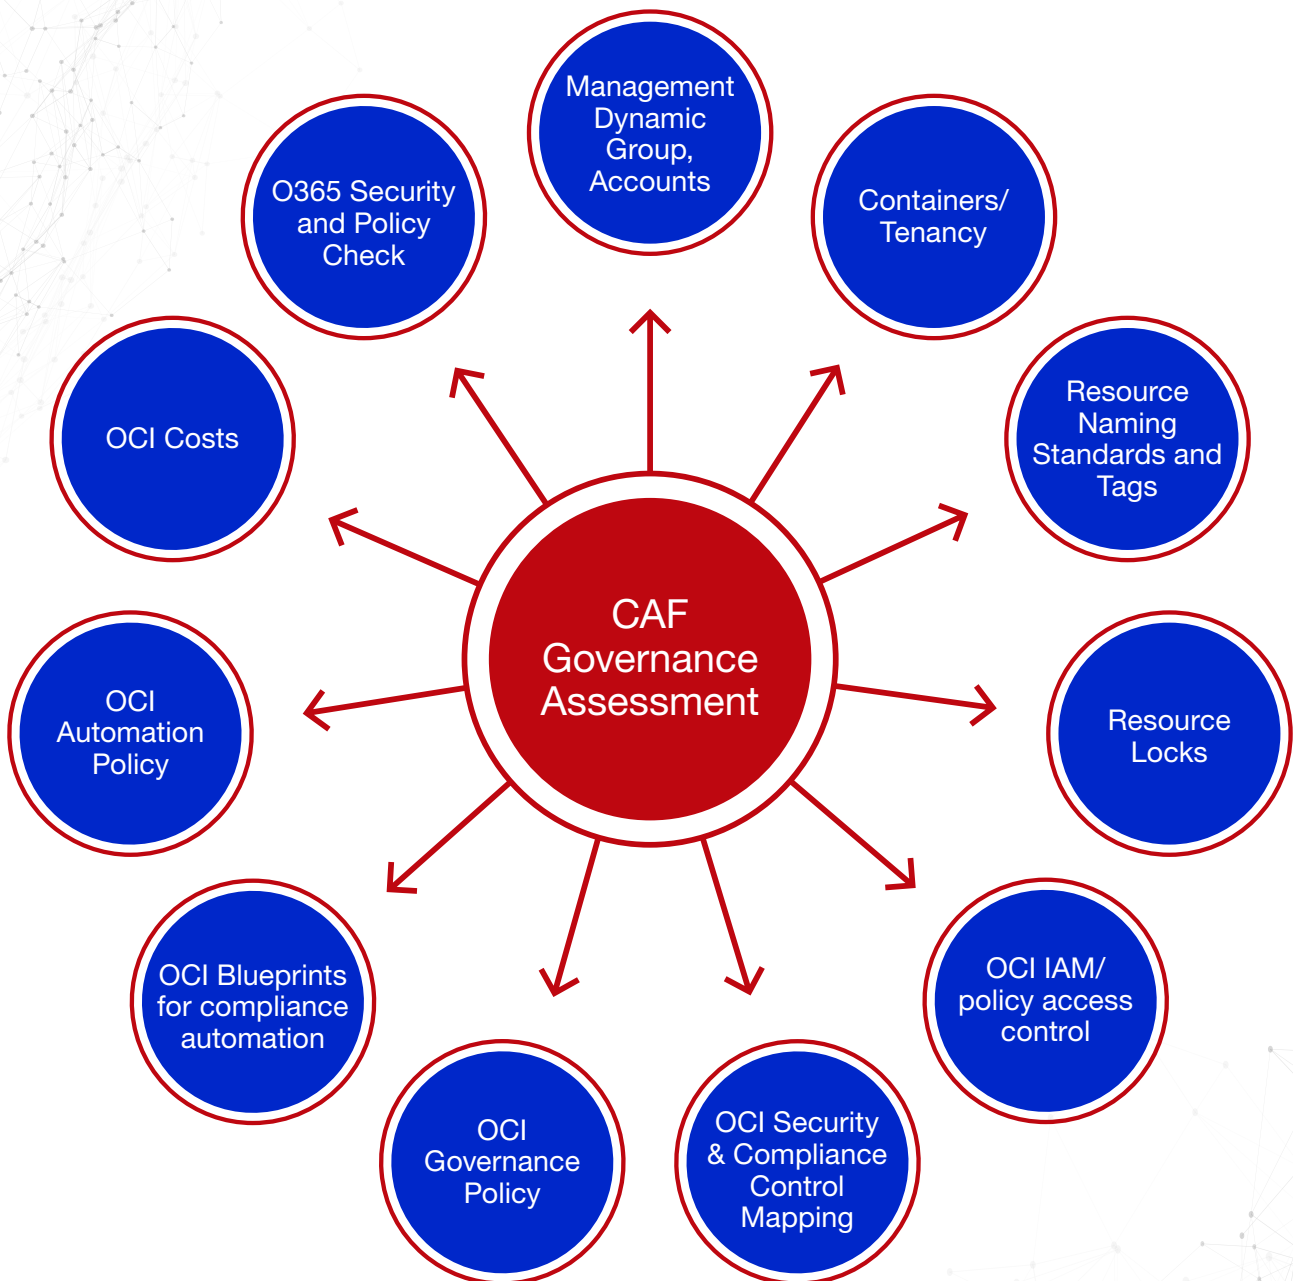

Workshop Highlights

- Expert overview on **cloud governance methodology**
- Recommendations on governance for **gap identification** with best OCI practices
- Support in identifying the right path to align business goals
- Assessment of **OCI subscription models** for landing zone deployment as per:
    - Cost and resource optimization practices
    - Industry best security and compliance
- Implementation and enhancement of **governance framework**
- Development and iteration of **governance controls**
- Understanding on policy aligned practices for **risk mitigation**

Workshop Deliverables

- **Advanced report** on governance assessment
- **Expert suggestions** on implementation of governance policy and blueprints

CAF Governance Assessment

- Management Dynamic Group, Accounts
- O365 Security and Policy Check
- Containers/ Tenancy
- OCI Costs
- Resource Naming Standards and Tags
- OCI Automation Policy
- Resource Locks
- OCI Blueprints for compliance automation
- OCI IAM/ policy access control
- OCI Governance Policy
- OCI Security & Compliance Control Mapping

Sign up now for the exclusive and interactive governance assessment workshop

Why **Cloud4C?**

Cloud4C delivers value driven solutions for **workloads on OCI.** The team and their domain expertise is integrated with **Oracle's advanced technologies** and tools to streamline business processes, improve decision making, and accelerate **digital transformation.**

- Global presence of 25+ countries, 4000 clients, Certified and skilled SMEs

- 10+ certifications that exhibit our global standards

- Customized Systems and Processes to meet the different needs of customer requirements in multiple industries.

- Single SLA at Application Login layer and complete ownership with managed services

Our Cloud Capabilities

- Over **2000 cloud experts** delivering 12+ years of legacy

- Proven expertise in **migrating 40000+ Instances** and **8000+ Databases**

- **Certified resources** for public cloud implementation, CloudOps, DevOps, Cloud Architecture, Security, SAP on Azure, Transformation and Migration

- Pre-designed and Industry/country-specific **compliance mapping**

- **AIOps powered managed services** with end to end ownership

- Intuitive **DR solutions** with stringent SLA for **RPO/RTO**

- Robust CAF covering all aspect of **DC Modernisation** and Transformation

- Industry aligned compliances mapping on OCI for **100% of compliance control** with SOC (SIEM/SOAR) services

- AIOps powered **threat detection** and **remediation**

Keep a check on the **cost, security, compliances, access control** and many more in your cloud and leverage your business without risks.
