- Microsoft Azure Virtual Desktop (Azure)
- Threat Protection (Security)
- AI Platform on Microsoft Azure
- Build AI Apps on Microsoft Azure

Advanced Specializations Future roadmap - 2025

- Hybrid Cloud Infrastructure with Microsoft Azure Stack HCI
- Data Warehouse Migration to Microsoft Azure

Solution Partner

- Solutions Partner for Infrastructure (Azure)
- Solutions Partner for Digital & App Innovation
- Solutions Partner for Data & AI (Azure
- Solutions Partner for Security
- Solutions Partner for Modern Work

- Partner of the Year, UAE 2022, Qatar 2020
- Rising Star of the Year, APAC 2021
- Security Partner of the Year (Malaysia 2023)
- Finalist – Endpoint Management Trailblazer (MISA 2025)

Cloud4C: Transforming Data Governance with Microsoft Purview

Data Protection

Comprehensive Data Protection

Proactive Data Loss Prevention

Effective Insider Risk Management

Holistic Data Security Posture Management

Data Governance

Data Source Identification

Data Quality

Data Curation

Data Estate Insights

Data Compliance

Compliance Management

eDiscovery and Audit

Policy Enforcement Communications

Data Lifecycle Management

Information Retention

Varied and Organized Data

Conventional and AI Data

Microsoft 365 and Multicloud

Shared Platform Capabilities
(Data Map, Data Classifications, Data Label, Audit, Data Connectors)

On-Premises, Cloud, and SaaS Applications

Proven Business Outcomes with Cloud4C

- **Up to 45% reduction in data compliance violations through policy tuning and automated enforcement**
- **100% mapping to required controls for ISO 27001, HIPAA, GDPR, PCI-DSS and regional frameworks**
- **Faster time-to-value with prioritized policy baseline delivered in ~4 weeks and ongoing monthly**
- **Improved data classification accuracy and reduced manual remediation effort**
- **Reduced insider-risk incidents and unauthorized sharing through combined DLP and identity signals**
- **Sustained governance maturity with a measurable roadmap and monthly KPI reporting**

Key Value Proposition

Unified discovery, classification and protection across M365, Azure, hybrid

AI-driven policy tuning and automated enforcement

Multi-cloud federation and end-to-end data lifecycle governance

Integrated DLP plus identity-aware insider-risk detection

Compliance-ready reporting mapped to ISO, GDPR, HIPAA, PCI

Why choose Cloud4C for Microsoft Purview Data Protection?

Unified Data Governance & Compliance

Discover, classify, and protect sensitive data across hybrid/multi-cloud.

End-to-End Purview Expertise

24x7 managed services for setup, policy, and ongoing monitoring.

Industry-Specific Compliance Accelerators

Prebuilt regulatory templates and policies aligned with BFSI, healthcare, manufacturing, and other regulated industries to fast-track compliance readiness.

CLOUD4C

SLA-Backed Data Protection & ROI

Assured accuracy, policy enforcement, and audit readiness.

Local and Sovereign Delivery Model

Global and regional SOCs plus sovereign cloud deployments to meet in country residency and regulatory requirements.

Embedded Enablement & AI-Driven Insights

Integration with Microsoft AI capabilities for automated insights, anomaly detection, and repeatable governance best practices.
