

Cloud4C Entra Zero Trust Starter Pack (ID + CA + PIM + Private Access)

Cloud4C Entra Zero Trust Starter Pack Offering

Unified Identity & Access Governance

Conditional Access & Risk-Based Controls

Privileged Identity Management (JIT & Least Privilege)

Zero Trust Private Access (ZTNA)

Compliance-Ready Access Policies

Guided Onboarding & Advisory

Proven Business Outcomes with Cloud4C

- Deployment completed within 2–3 weeks with baseline Zero Trust policies
- 45% reduction in privileged account misuse post-PIM deployment
- 100% compliance mapping to ISO 27001, HIPAA, GDPR, NIST Zero Trust principles
- Reduced unauthorized access risks across enterprise users and apps
- Improved governance maturity with quarterly audits & compliance dashboards
- Enterprise-proven delivery across BFSI, healthcare, manufacturing, government, telecom, and energy

Cloud4C Entra Zero Trust Starter Pack Methodology

- Review current identity and access policies
- Benchmark against NIST Zero Trust and global compliance standards (ISO 27001, HIPAA, GDPR)
- Identify high-risk access patterns and privileged account exposures

- Guided rollout of Entra ID, Conditional Access, PIM, and Private Access
- Configure baseline identity, access, and privilege policies
- Enable just-in-time (JIT) access and least privilege enforcement

- Validate ZTNA connectivity for private applications
- Enable dashboards for audit-ready identity & access reporting

Optimization & Advisory

- Continuous policy tuning and insider risk mitigation
- Advisory on Zero Trust maturity uplift and enterprise adoption pathways
- Integration of AI & Copilot insights for anomaly detection and guided identity investigations

Why Cloud4C for Entra Zero Trust Starter Pack?

Proven Zero Trust Rollouts

Delivered successful identity and access transformations across BFSI, healthcare, manufacturing, and government.

Regulatory-First Access Policies

Prebuilt Conditional Access & PIM templates mapped to ISO 27001, HIPAA, GDPR, PCI-DSS, and NIST Zero Trust standards.

Sovereign Cloud Expertise

Deployments tailored for country-specific regulatory environments and Microsoft Sovereign Cloud.

Clear roadmap to expand from Starter Pack into the full Entra Security & Governance suite.

Advisory-Led Enablement

Structured onboarding, policy workshops, and training for IT & security teams to ensure sustainable adoption.

Al & Copilot Integration

Built-in readiness for Copilot for Security with risk-based access insights and anomaly detection.
