Cloud4C Microsoft Cloud Security – Enterprise Suite

Cloud4C Microsoft Cloud Security – Enterprise Suite Offering

CLOUD4C
A CtrlS Company

Microsoft Defender CNAPP (CSPM + CWPP)	Defender for DevOps & APIs	Azure-native WAF, Firewall & DDoS Defense
Confidential & Identity-Aware Computing	Unified Security Dashboard	Advisory & Governance Reports

Proven Business Outcomes with Cloud4C

- 100% compliance alignment to ISO 27001, HIPAA, GDPR, and PCI-DSS frameworks
- 35% reduction in misconfigurations within six months of CNAPP deployment
- 40% faster remediation cycles for vulnerabilities across workloads and pipelines
- Improved operational efficiency with unified dashboard reducing silos across teams
- Predictable, transparent pricing bundles with enterprise-grade SLAs
- Enterprise-proven deployments across BFSI, healthcare, government, telecom, manufacturing, retail, and energy

Cloud4C Microsoft Cloud Security – Enterprise Suite Methodology

- Review enterprise cloud security posture across workloads, identities, APIs, and networks
- Identify misconfigurations, exposed resources, and compliance gaps
- Benchmark against ISO 27001, HIPAA, GDPR, PCI-DSS, and Zero Trust standards

- Run risk and compliance checks with unified dashboards
- Validate posture alignment with ISO, HIPAA, GDPR, PCI-DSS frameworks
- Enable audit-ready governance reports tailored to industry mandates

Baseline Security & Risk Assessment

Guided Deployment & Integration

Validation & Compliance Assurance

Continuous Optimization & Advisory

- Rollout of Microsoft Defender CNAPP, DevSecOps, WAF/DDoS, and Confidential Computing
- Configure unified policies for workloads, pipelines, data, and network protection
- Establish Zero Trust enforcement with policy-driven access and automated controls

- Ongoing tuning of posture, workload, and data security policies
- AI & Copilot-driven anomaly detection, remediation, and compliance validation
- Premium SLA-backed advisory for Zero Trust maturity uplift and proactive governance

Why Cloud4C for Microsoft Cloud Security – Enterprise Suite?

Unified Zero Trust Protection

Consolidates CNAPP, DevSecOps, WAF/DDoS, data security, and confidential computing in one enterprise-grade suite.

Regulatory & Compliance Assurance

Prebuilt templates mapped to ISO 27001, HIPAA, GDPR, PCI-DSS, and regional mandates for audit readiness.

Global SOC Integration

Always-on monitoring with regional SOCs providing contextualized responses and faster threat containment.

CLOUD4C

Predictable Enterprise Pricing

Transparent, bundled pricing with enterprise-grade SLAs for cost clarity and secure scaling

Sovereign Cloud Expertise

Proven delivery across regulated industries with alignment to country-specific compliance and Microsoft Sovereign Cloud.

AI & Copilot-Enhanced Governance

AI-driven anomaly detection, predictive insights, and Copilot-guided remediation and compliance validation.
