External Threat Visibility  
(EASM/MDTI)

IoT/OT Risk Identification

Audit & Compliance Readiness

## Proven Business Outcomes with Cloud4C

- 25% average uplift in Microsoft Secure Score within 2–3 weeks
- 100% board-level reporting delivery with prioritized recommendations
- Accelerated audit readiness for ISO 27001, HIPAA, RBI, and GDPR
- Comprehensive visibility across cloud, endpoint, IoT/OT, and external attack surface
- Faster remediation cycles with prioritized guidance for quick wins
- Executive alignment through board-ready, risk-informed reporting

# Cloud4C Security Posture Assessment Methodology

- Assess Microsoft 365, Azure, endpoint, IoT/OT, and external attack surfaces
- Review Secure Score, Defender telemetry, and Sentinel analytics
- Benchmark against ISO 27001, RBI, HIPAA, GDPR, and PCI-DSS

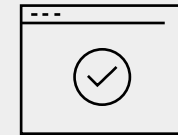

## Baseline Posture & Risk Review

## Workshop-Driven Alignment

- Conduct up to 3 focused sessions with CISOs, infra teams, and end-users
- Build Zero Trust adoption roadmap tailored to enterprise priorities
- Deliver awareness & readiness training for employees

- Run prioritized risk & compliance checks across cloud and external assets
- Validate threat detection coverage and regulatory preparedness
- Deliver board-ready reports with actionable recommendations

## Validation & Reporting

## Continuous Advisory & Optimization

- Provide ongoing guidance for audit readiness and compliance tracking
- Recommend quick wins with prioritized remediation pathways
- Offer clear handover into Cloud4C managed services for long-term maturity
