# Protect and Govern Data Risk-proof with Microsoft Purview

**Unified Platform for Data Security, Compliance, and Insider Risk Management. Implemented and Managed by Cloud4C.**

Microsoft Purview helps enterprises classify, protect, and govern sensitive data across Microsoft 365, endpoints, and multi-cloud platforms. Combined with insider risk management, data loss prevention, and litigation readiness, Purview creates a holistic framework for modern data security. Cloud4C ensures seamless adoption and management of Microsoft Purview for enterprises of all sizes and complexities. From strategy and implementation to continuous monitoring and compliance alignment, Cloud4C enables organizations to transform their compliance burdens without any operational disruption.

## Cloud4C's Microsoft Purview Implementation Approach & Offerings

### Design & Deployment

- Requirements analysis and landscape mapping

- Data classification, sensitivity labeling, and DLP policy configuration

- Insider risk use case modeling and risk controls setup

- Architecture design, integration, and disruption-free deployment

### Operate & Manage

- 24×7 monitoring and insider risk investigations

- Proactive DLP enforcement across workloads

- eDiscovery workflows (legal hold, case creation, data export)

- Continuous compliance tracking across GDPR, HIPAA, RBI, PCI-DSS, ISO 27001

### Optimize & Evolve

- Ongoing policy tuning to reduce false positives and improve coverage

- AI-driven governance for emerging data protection needs

- Regular reporting, insights, and audit support

- Future-ready alignment with regulatory and business requirements

# Cloud4C's Managed Microsoft Purview Services

### Information Protection & DLP
Deploy, manage, and enforce classification and DLP rules across Microsoft 365, devices, and multi-cloud

### Insider Risk Management
Detect, analyze, and act on risky activities with proactive investigations

### eDiscovery & Litigation Readiness
Simplify legal holds, case reviews, and exports for audit preparedness.

### Compliance Monitoring
Map Purview controls directly to GDPR, HIPAA, RBI, ISO, and more.

### Ongoing Policy Tuning
Regular updates and optimization for evolving compliance and risk landscapes.

# Key Differentiators

Unified compliance alignment across global frameworks

Litigation readiness for frequent audits

99.99% uptime SLA for mission-critical environments

End-to-end implementation and management of Purview

Proactive insider risk detection with 24×7 monitoring

AI-ready governance for AI-generated data & innovation
