

Seamless Migration to Azure for a Manufacturing major in Japan

About Client

With Headquarters in Japan, this company which began in 1947 is in the machine tools trade. Since then, this company has evolved into a "specialist trade company" with over 100 domestic and overseas offices and is engaged in three core fields: "Production Equipment", i.e., peripheral equipment and machine tools used in factories; "Housing Equipment and Materials"; and "Home Products", i.e., amenities and daily-use products, such as furniture and electrical appliances"

Challenges

Current model was neither scalable nor flexible to accommodate the wide range of new customer services they wanted to offer.

Customer also uses Open Text Products extensively and wanted somebody to manage the Open Text platform as well.

Needed a single partner who can deliver managed services, migration services and provide a managed cloud platform.

Executive Summary

In-line with the management plans for domestic and global expansion Yamazen was looking for highly scalable and agile SAP platform.

Cloud4C, being a global premium SAP Partner, has the expertise in providing SAP Basis solutions. SAP partnered with Cloud4C, to provide understood, their business processes and successfully migrated the SAP solutions on Azure from Dedicated Private Cloud, helping them achieve better business growth and well- serviced customer.
