

DESTINATION RPA AUTOMATION JOURNEY WITH CLOUD4C MILESTONES

- High Volume Repetitive Tasks - Automated
- Streamlined Business Processes
- Boosted Performance & Productivity

Fortune Business Insights estimates growth of RPA Market to be **USD 6.81 billion by 2026**, driven by demand for **Cognitive Technology** and boost in **Cloud Adoption**.

RPA - THE CLOUD4C WAY

ENSURING A HASSLE-FREE JOURNEY TO ACHIEVING YOUR BUSINESS PROCESS AUTOMATION GOALS

On average, experienced people spend 10% to 20% of work hours on repetitive tasks. Robotic Process Automation leverage solutions to automate such mundane or labor-intensive tasks, accelerating enterprises' digital transformation journeys. Integrating seamlessly with the existing enterprise infrastructure, RPA solutions automate processes - at a fraction of the time and monetary investment.

At Cloud4C, we help organizations to adopt RPA, to accelerate business process execution with higher accuracy, providing a much-needed boost in their transformative journey. The outcome - an exponential increase in productivity and a decrease in operational expenses.

APPROACH - 4 WAYPOINTS TO ASSESS RPA COMPATIBILITY

WE ASSESS AND IDENTIFY IF YOUR ROADMAP TO ADOPT RPA IS IN SYNC WITH YOUR TRANSFORMATION STRATEGY - IN FOUR SIMPLE STEPS.

ASSESS

Start with automation feasibility assessments

MAINTAIN/SUPPORT

Continuous refinement with auto-learning

PROOF OF VALUE

Identify RPA capabilities with a PoV, against results

IMPLEMENT

Test and deploy custom-built bots and RPA solutions

HOW WE ASSIST WITH RPA STRATEGY

CONSULTING, IMPLEMENTATION, & SYSTEM INTEGRATION

Our spectrum of end-to-end services in delivering robust and reusable Robotic Process Automation solutions - be it for assessing automation feasibility or managing RPA Robots, or a host of other possibilities.

ASSESS & ADVICE

Defining the automation strategy and the right set of tools, we consult on how organizations can optimally leverage RPA. This involves -

- Understanding business goals
- Identifying/recommending potential RPA processes
- Defining and prioritising processes to be automated
- Performing feasibility check
- Leveraging 200+ man-years experience and certified experts

IMPLEMENT & RUN

Chalking an implementation approach with a result-driven service delivery model, we help achieve the desired results - in weeks.

- RPA maturity framework to guide customer's automation journey
- A proven six-step RPA implementation process to integrate and scale automation
- Center of Excellence (CoE) to maintain, govern, and support sustainable RPA solutions
- Supporting Governance Model to assure compliance with best practices, standards, and regulations

RPA AS A SERVICE

Avoid the burdens of capital expenditure and scale RPA to suit your needs with flexible and monthly subscriptions.

- Engagement as an implementation partner to develop customized RPA solutions
- RPA as a Service model, with CoE having end-to-end ownership
- RPA CoE operating on four proven pillars of Operations, Governance, Support & Enablement, Communication & Collaboration - driving RPA success

BENEFITS TO ADOPTING AN AUTOMATION STRATEGY

We guide enterprises to achieve their automation goals, thereby making their business processes more efficient, more compliant, and more intelligent.

Accuracy is second nature to RPA bots and this helps in avoiding manual-errors, besides ensuring process compliance.

RPA solutions operate 24/7 with the same efficiency, accelerating process execution by up to 10 times.

Lean and rapidly deployable, RPA solutions enable people to focus on strategic functions, to achieve larger goals.

RPA bots can be operated all the time, and from anywhere, ensuring business continuity.

Frees up employees, enabling them to focus on higher-value activities, bringing down the TCO.

Customer experience improves with ROA empowering support teams for task efficiency.

With RPA, enterprises can scale up and down easily, with little or no impact on existing operations.

RPA solutions are flexible to changes and can be adapted to meet any revisions or emerging new requirements, with minimal changes

CLOUD4C FOR CLOUD OPPORTUNITIES & BEYOND

Cloud is more than a destination, a journey, or a technology. To us, the cloud opens up opportunities and fosters innovation. At Cloud4C, we combine business acumen, integrated technology services, proprietary and cloud-native tools and a creative, people-first approach to enable enterprise transformation.
